

Congress Select Committee on Assassinations that re-investigated the deaths of President John F. Kennedy and Dr. Martin Luther King, Jr. in the 1970s and I have served as a consultant to the Federal Bureau of Investigation, the Veterans Administration, the Drug Enforcement Agency and the U.S. Department of Justice. A copy of my *curriculum vitae* is attached.

2. At Mr. Jeffrey Havard's trial for the death of Chloe Britt in Adams County Circuit Court in 2002, the State presented testimony persuasive to the jury that the infant's death was caused by "Shaken Baby Syndrome" based on the presence of brain and retinal hemorrhages.

3. It is my opinion, to a reasonable degree of medical certainty, that Chloe Britt's autopsy findings are entirely consistent with having occurred as the result of a short accidental fall, as Mr. Havard has consistently described, and are not consistent with the baby having been shaken to death for which Mr. Havard was convicted.

4. Many medical research and scientific publications during the past ten years have shown that shaking a baby cannot cause the very prominent external bruises and contusions on Chloe's head and the prominent subcutaneous bleeding that she incurred. The literature and my fifty years of experience show that an external blunt force impact is necessary to cause those injuries; that such an external impact can also cause a subdural hemorrhage, retinal hemorrhages and brain swelling to develop, which, in this matter, were misattributed to shaking; and that both the external and internal injuries to Chloe could be caused by the impact of a short fall as described by Mr. Havard.

5. Chloe had no neck injuries, chest injuries, spine or rib fractures that further research has shown can be produced by the abusive shaking of a baby.

6. Included in the more recent literature is the finding that retinal folds in the eyes are not proof that Chloe was severely shaken, as testified to at the trial, and do occur as the result of many types of innocent head trauma, such as from short accidental falls (see P. Lantz, Perimacular retinal folds from childhood head trauma, 328 Brit. Med. J. 754. 2004).

7. Further, the sphincter muscles around the anus – and around the urinary bladder – normally relax when a baby loses consciousness and becomes comatose, and when death occurs. Relaxation of the sphincter muscles causes dilatation of the anus which is common and entirely normal and is the reason that spontaneous defecation and urination often accompany the dying process. The very small anal abrasions described commonly occur innocently during the passage of hard stool, from wiping the anus, from rubbing against a diaper, or from scratching, and are not evidence that Chloe was sexually assaulted.

8. It is my opinion, to a reasonable degree of medical certainty, based on my education, training and fifty years' experience as a forensic pathologist and medical examiner, that Chloe Britt's clinical, medical and autopsy findings, including her head bruises, are entirely consistent with having resulted from a short accidental fall and are not consistent with Shaken Baby Syndrome.

9. It is further my opinion that there is absolutely no evidence – no circumstantial, medical, forensic, or autopsy evidence – that Chloc was sexually abused.

Michael M. Baden, M.D.

WESTERN DIVISION**

JEFFREY HAVARD

PETITIONER

VS.

CIVIL ACTION NO.: 5:08-CV-275-KS

**CHRISTOPHER EPPS, Commissioner, Mississippi
Department of Corrections, and
JIM HOOD, Attorney General of the
State of Mississippi**

RESPONDENTS

DECLARATION OF DR. MICHAEL M. BADEN

Pursuant to 28 U.S.C. § 1746, I, Dr. Michael M. Baden, State as follows:

1. I am a Board-certified anatomic, clinical and forensic pathologist, former Chief Medical Examiner of New York City and recently retired Chief Forensic Pathologist for the New York State Police.

I received my Medical Degree in 1959 from New York University School of Medicine, then I interned in New York City hospitals. From 1961 to 1986, I worked in the Office of the Chief Medical Examiner in New York City. I have held professorial appointments at Albert Einstein Medical School, Albany Medical College, New York Law School and John Jay College of Criminal Justice. I have worked closely with the New York State Police Child Abuse and Violent Crime Analysis Unit (VICAP). I have served as the President of the Society of Medical Jurisprudence and Vice President of the American Academy of Forensic Sciences. I was the Chairman of the Forensic Pathology Panel of the U.S. Congress Select Committee on assassinations that investigated the deaths of President John F. Kennedy and Dr. Martin Luther King, Jr. For further information, I have attached a copy of my CV.

2. I have been informed that at Jeffrey Havard's trial for the death of Chloe Britt in Adams County Circuit Court, the State's experts concluded that the infant victim's death was caused by "Shaken Infant Syndrome." They based this conclusion on the presence of brain hemorrhages and retinal hemorrhages. Furthermore, the State's medical experts concluded that

the injury was inflicted in the hour before Chloe began showing symptoms while Chloe was in Mr. Havard's care.

3. After Mr. Havard was convicted of capital murder, at Mr. Havard's request, I reviewed the following documents concerning the medical evidence used against him:
 - a. Birth records for Chloe Britt;
 - b. Well Baby visits and pediatric records for Chloe Britt from Dr. Dar;
 - c. Medical records on Chloe from the Natchez Community Hospital;
 - d. Autopsy report completed by Dr. Stephen Hayne on February 22, 2002;
 - e. Trial testimony of Dr. Ayesha Dar, Dr. Stephen Hayne, and Dr. Laurie Patterson;
 - f. Photos from the autopsy of Chloe Britt.
4. In my opinion, Chloe Britt's death is entirely consistent with a short fall, and not with an abusive shaking.
5. There has been considerable new medical literature since Mr. Havard's trial that subarachnoid hematomas, subdural hematomas, and retinal hemorrhages can occur in many types of traumatic head injury, is not unique for abusive shaking and may not result from shaking.
6. According to the medical records, Chloe Britt had only mild edema, with low brain swelling. The child was without oxygen and without a heartbeat for a significant period of time before arriving at the hospital. The child may have been deceased when she arrived at the hospital, and when medical personnel attempted to resuscitate her.
7. Chloe's signs and symptoms did not establish the classic triad of Shaken Baby Syndrome – a condition which now many forensic pathologists have concluded does not exist; and who now conclude that scientific evidence shows that shaking a baby cannot produce subdural hemorrhages or sufficient brain damage to cause a baby to die.

8. Chloe displayed only retinal hemorrhaging and subdural hematoma, not sufficient findings to establish the classic triad of Shaken Baby Syndrome. Furthermore, there was no bruising within the brain tissue itself as one might expect if the brain were to have been violently thrown back and forth within the skull during an abusive shaking as required by the Shaken Baby Syndrome theory. A more complete autopsy and analysis would have examined the short fall as the cause of death, and determined if any other injuries indicated the cause of death. The mere findings of retinal hemorrhaging and brain swelling were insufficient- then and now- to conclusively determine the cause of death was Shaken Baby Syndrome.
9. New medical literature has shown that retinal folds have been observed in infants dying from injuries not related to abusive shaking. Patrick E. Lantz, *Perimacular Retinal Folds From Childhood Head Trauma*, 328 Brit. Med. J. 754 (2004).
10. Chloe had retinal hemorrhages, which at the time of Mr. Havard's trial could be taken as indicative of Shaken Baby Syndrome. Recent textbooks clearly acknowledge many causes for retinal hemorrhages. Hypoxia, a rapid rise in the intracranial pressure, and/or a markedly elevated intravascular pressure could well account for the eye findings. *Child Neurology* (John H. Menkes, ed., 6th ed. 2000); Daniel M. Albert, *Principles and Practices of Ophthalmology* (2d ed. 2000); D.G. Talbert, *Paroxymal Cough Injury, Vascular Rupture and "Shaken Baby Syndrome"*, 64 Med. Hypothesis 8 (2005). Although this literature did not exist at the time of Mr. Havard's trial, sufficient information was known for a responsible medical examiner to determine shaking was not the only cause for retinal hemorrhaging in a young child, particularly if there were not other substantial signs of shaking.
11. There is little evidence to support that Chloe sustained a severe, violent, abusive shaking. There were no rib fractures. There were also no skeletal or muscular injuries to the neck demonstrated at autopsy. There were no bruises on her chest, as one might expect from a violent, abusive shaking.
12. Furthermore, the autopsy findings and testimony concluding there were intentional anal injuries was premature and short-sighted. The anus can dilate in a coma or after death, and any anal abrasion could be due to innocent causes, such as constipation or diarrhea. If the child was deceased prior to arriving at the hospital, the anal dilation seen by doctors at the hospital and in the autopsy could have been natural changes in the body upon death.

13. In my opinion, the death of Chloe Britt is entirely consistent with a short fall event and the death is not consistent with abusive shaking. From my analysis, Chloe was not sexually assaulted and she died of injuries consistent with an accidental drop. I base this conclusion on the medical record and recent medical literature, and I hold this opinion to a reasonable degree of medical certainty.

I declare under penalty of perjury that the foregoing is true and correct.

This the 13th day of March, 2013.

CURRICULUM VITAE

EDUCATION

- The City College of New York (1955) B.S. Degree
- New York University School of Medicine (1959) M.D. Degree

POST-GRADUATE TRAINING

1959-1960 Intern, First (Columbia) Medical Division, Bellevue Hospital
1960-1961 Resident, First (Columbia) Medical Division, Bellevue Hospital
1961-1963 Resident, Pathology, Bellevue Hospital
1963-1964 Chief Resident, Pathology, Bellevue Hospital

LICENSURE

- New York State Medical License (1960)
- Diplomate, National Board of Medical Examiner's (1960)
- Diplomate, American Board of Pathology:
 - Anatomic Pathology (1965)
 - Clinical Pathology (1966)
 - Forensic Pathology (1966)

PROFESSIONAL POSITIONS

1985-2011 Director, Medicolegal Investigations Unit, New York State Police
1961-1985 Office of Chief Medical Examiner, New York City; Chief Medical Examiner (1978-1979)
1981-1983 Deputy Chief Medical Examiner, Suffolk County, New York; Director of Laboratories, Suffolk County, New York

TEACHING APPOINTMENTS

- 1961-1989 New York University School of Medicine, Associate Professor,
Forensic Medicine
- 1975-2001 Visiting Professor of Pathology, Albert Einstein School of Medicine
- 1975-1988 Adjunct Professor of Law, New York Law School
- 1975-1978 Lecturer in Pathology, College of Physicians and Surgeons of
Columbia University
- 1986, 1989 Visiting Professor, John Jay College of Criminal Justice
- 1965-1978- Assist Visiting Pathologist, Bellevue Hospital, New York
- 2002 Adjunct Lecturer, The Cyril H. Wecht Institute of Forensic Science
and Law, Duquesne University School of Law
- 2002 Distinguished Professor/Adjunct Lecturer, Henry C. Lee Institute,
University of New Haven (Connecticut)

GOVERNMENTAL APPOINTMENTS

- 1977-1979 Chairman, Forensic Pathology Panel, United States Congress, Select
Committee on Assassinations, Investigations into the deaths of
President John F. Kennedy and Dr. Martin Luther King
- 1973-Present Member, New York State Correction Medical Review Board
- 1976-Present Member, New York State Mental Hygiene Medical Review Board
- 1983-1986 Member, National Crime Information Center, Committee on Missing
Children, United States Department of Justice (F.B.I.)
- 1971-1975 Special Forensic Pathology Consultant, New York State Organized
Crime Task Force (investigation of deaths at Attica Prison)
- 1974-2006 Director and/or Moderator, Annual Northeastern Seminar in
Forensic Medicine, Colby College, Maine
- 1973-1987 Lecturer, Drug Enforcement Administration, Drug Law Enforcement
Training School, United States Department of Justice

PROFESSIONAL ORGANIZATIONS

1966-Present	American Academy of Forensic Sciences; Fellow Vice President and Program Chairman (1982-1983)
1965-Present	The Society of Medical Jurisprudence; Fellow, President (1981-1985)
1966-Present	College of American Pathologist; Fellow, Chairman, Toxicology Subcommittee (1972-1974)
1971-1975	College of American Pathologists Foundation; Forensic Pathology Seminar Faculty
1973-1976	American Board of Pathology; Forensic Pathology Board Test Committee (1973-1976)
1966-1986	American Society of Clinical Pathologist; Fellow Member, Drug Abuse Task Force (1973-1977)
1965-1978	New York State Medical Society; Chairman, Section of Medicolegal and Workers' Compensation Matters (1972)
1965-Present	Medical Society of the County of New York
1969-1978	National Association of Medical Examiner's
1965-Present	American Medical Association

HONORS

- The City College of New York: Senior Class President; Editor-in-Chief of The Campus (newspaper); Phi Beta Kappa
- Honor Legion, New York City Police Department, 1969
- College of American Pathologists, Certificate of Appreciation (Chairman, Toxicology Resource Committee, 1972-1975)
- American Academy of Forensic Sciences, Award of Merit, 1974 and 1983
- Drug Enforcement Administration, United States Department of Justice, Certificate of Appreciation, 1982

- New Jersey Narcotic Enforcement Officers Association, Certificate of Appreciation, 1977
- Fire Department of the City of New York, Certificate of Appreciation, 1978
- New York State Bar Association, Certificate of Appreciation, 1980
- New York City Health and Hospitals Corporation, Certificate of Appreciation for participation in development of emergency facilities for Emergency Medical Services for the City of New York, 1980
- New York University, Great Teacher, 1980
- First Fellow in Forensic Science of the University of New Haven, Henry C. Lee Institute, (Connecticut), 2002
